RoboForm Crack is a powerful application that allows you to store and to manage login information, bookmarks and more useful items in a secure location. The application integrates as a toolbar in the most popular Internet browsers such as Internet Explorer, Firefox, Chrome and Opera. Save website login info and bookmarks The most used function of the program is to store website login information. You can add a new item by navigating to a website and entering the username and the password. The browser's toolbar detects the password field and prompts you to save the password and to store it in the database. You can also use the program to store bookmarks and to access them from the toolbar. The program allows you to navigate to a bookmark by selecting it from the toolbar. When you save login information you can open the website and enter the password with just one click. It allows you to bypass the login process and to quickly access the website. Manage fill forms To allow the program to fill forms you need to create an identity that includes a wide variety of information from names or the cell number to bank account number or SSN. Nearly all pieces of information you might need to fill an Internet form can be stored in the program. If there is something that the developer missed, you can create your own custom fields. Save passwords from Outlook or Windows Live Mail The program can also save passwords from other applications such as Outlook or Windows Live Mail. If it runs the program detects the password fields and prompts you to save the information. Later you can open the application and enter the login information with just one click. Store data about your contacts in an encrypted database RoboForm includes a Contacts database that can be used to store important information that you want to protect from other users. This is a plus since not all the applications that deal with this type of details have the option to protect them with a password. Importing feature If you have a lot of passwords stored in the Internet browsers, the program includes the option to migrate the information. You can import data from other browsers but also from Windows Address Book and from CSV or TXT files. Online storing options A very useful feature
