LetmeSync Product Key

----- LetmeSync is a small utility designed to quickly sync files between various cloud storages. LetmeSync allows you to choose what types of content you wish to synchronize (for instance, documents, photo, music), as well as to create a list of extensions for the files to be processed. Then all you have to do is to add files to the selected cloud storage and launch the program which will do all the rest. LetmeSync works with most file systems and all major cloud services. You can choose from a large number of cloud storages, supported by LetmeSync. LetmeSync supports synchronization with Dropbox, SkyDrive, SugarSync, Carbonite, Just Cloud, OpenDrive, Zip Cloud, YouSendIt, etc. LetmeSync allows you to synchronize directories (both source and target), as well as individual files (both source and target). It can also process any files in a batch. LetmeSync can work with the "new" Windows file systems (NTFS, etc.) and does not require administrative privileges. LetmeSync also lets you scan and replace old (inaccessible) files, or remove them from the cloud. LetmeSync can let you sync files even when LetmeSync is not running. LetmeSync was designed for Windows Vista and above. Details

----- Feel free to use the most natural text editor of your choice when creating files or while using LetmeSync. LetmeSync allows you to choose which types of content you wish to synchronize. You can choose from a list of extensions that will be converted by the program. When you select certain types of content and extensions, a list of their available targets is displayed. You can see this list on the Main window of the program as well as in the toolbar menu. To select a target, you can type its name directly into the appropriate input field, or click its icon on the toolbar. You can add as many targets as you wish. In order to switch between already selected targets, you can click the menu items on the toolbar or press one of the buttons (CTRL+F, CTRL+S, CTRL+G, CTRL+T, CTRL+W). LetmeSync supports the following extensions: *.docx *.xlsx *.pptx *.txt *.xls *.jpg *.pdf *.gif
