Note that the bigger the number, the less repeats you will get - b = the type of pattern to be used. As an example, the first option is a wide circle while the second is a narrow one - c = how many colors the background and the circle should use. But this is not the case because Radial Screen Saver has few color choices and just a single pattern. By default, two circles are being used for creating the radial pattern. But you can opt for a single circle as well as change the colors for the background and each pattern. The speed can be controlled too (the minimum speed is set by default). Unfortunately, it's not possible to pick any color from the spectrum since there are few options available in this case, and there is no way to change how the radial pattern is generated. Also, the pattern doesn't have a high quality, so improvements are welcomed as far as graphical polishing is concerned.
