But Adobe has done all of the important things: They've created new features, they've made important improvements, they've made tools for creating web art work, and they improved their online sharing tools to make it easy to create, edit, and share images on the Web. With the commercial version, Pixelmator, they also include powerful 3D tools like lights, shading, camera effects, and rendering. Featuring a new feature called "Drafts," Media Cloud for mobile is ideal for creating web-only documents on the go. With no file size limits, you can work anywhere, on any device, with one or many users.
